

## **Outpatient Neuropsychiatric Evaluation Costs and CPT Codes**

We regret that our office can no longer provide medical insurance billing for outpatient services. Payment is expected on the day of an appointment unless prior arrangements have been approved by our business office. Total charges for the Cognitrace Study are \$1500. This includes the complete Neurophysiology Exam, Pediatric Neurologist's Interpretation and Report, and the Child Neuropsychiatrist's Interpretation and Report. Continued Medication Consultation by our Child Neuropsychiatrist with the family or attending physician is also included. One third of the fee can be paid on the day of testing; two additional payments may be pre-arranged for by using post dated checks or pre-authorized credit card charges.

The following information is provided for use in filing for reimbursement by the patient's insurance. It is not a guarantee of payment reimbursement or claims approval by the insurance carrier.

### Cognitrace Study- Neurophysiology Exam (1-2 hours)

95819 Complex EEG

92585 Auditory Evoked Response

95930 Visual Evoked Response

96116 Cognitive Evoked Response

### Written Reports

1. Neurophysiology Exam interpreted by John Seals, M.D., Pediatric Neurologist
2. Medication recommendations after neurologist's report is reviewed by Dan Matthews, M.D., Pediatric Neuropsychiatrist

### Additional insurance information (for use with self-filing only)

Procedures coded as Outpatient Medical Diagnostics under Neurology.
