

## **Outpatient Neuropsychiatric Evaluation Costs and CPT Codes**

We regret that our office can no longer provide medical insurance billing for outpatient services. Payment is expected on the day of an appointment unless prior arrangements have been approved by our business office. One third of the fee is expected on the day of testing; two additional payments may be pre-arranged for by using post dated checks or pre-authorized credit card charges.

Total charges for the Cognitrace Study are \$1500. This includes the complete Neurophysiology Exam, Pediatric Neurologist's and the Child Neuropsychiatrist's Interpretations and Reports. Continued Medication Consultation by our Child Neuropsychiatrist with the family and attending physician is also included. If a Neuropsychological exam is also scheduled, an additional \$1500 charge will apply.

The following information is provided for use in filing for reimbursement by the patient's insurance. It is not a guarantee of payment reimbursement or claims approval by the insurance carrier.

### Cognitrace Study- Neurophysiology Exam (1-2 hours) - \$1500 Charge

95819 Complex EEG  
92585 Auditory Evoked Response  
95930 Visual Evoked Response
